25X1A

REQUIREMENT NO. HTA/SI/R58/58: Scan photography within a 50 nautical mile radius of Yalta to identify missile test activity or possible construction of "herringbone" sites.

REMARKS:

Photography covering the area within a 50 nautical mile radius of Yalta was scanned for missile test activity including herringbone-type missile sites. Approximately 75 percent of the area, including Yalta and vicinity, was cloud covered. A probable missile launching installation located on the Black Sea coast about 27 nautical miles west of Yalta and 2.5 miles west of Balaklava is discussed in Photographic Intelligence Memorandum CIA/RR-HTA-ML3-57. No other missile activity was noted.
